H • Administration					
Team creation	✗	✗	✗	✗	✓
Audit log (view)	✗	✗	✗	✗	✓
User / designation management	✗	✗	✗	✗	✓

Notes

- SAM and SM carry employee-level feature access; the differences vs SA are recruitment and team-level reporting. Only SD and Business Admin hold elevated approval/admin rights.
- Recruitment invite is open to SAM and above; the final agreement verification / onboarding confirmation is Business Admin only.
- Monthly quota may be set by SAM / SM / SD for their team; if a Director and a Manager both set a value, the Director's value overrides.
- All approvals, auto-approvals, payouts and configuration changes are written to the audit log (Global Rule 2); audit log view is Business Admin only.
- Own invoice generation is per associate; for client signing, an invoice can also be accessed by the submitting associate's SM and SD (chain oversight). Payment tracking (marking Paid/Unpaid) is Business Admin only.
- All value fields accept percentage or absolute amounts to 2 decimal places (Global Rule 1).
