

VIRTUAL OFFICE (VO) — SYSTEM WORKFLOWS

Companion to Meeting Minutes (16 Jul 2026) — Meeting with Levi Jan Clavesillas

Draft v7 · Flows 1–4 detailed

Scope of this document

Four workflows were discussed: (1) Recruiting, (2) Product creation, (3) Product submission, (4) Payment tracking. Only the Recruiting workflow is fully specified here. Flows 2–4 are reserved and will be filled in on the client's next update.

1. RECRUITING WORKFLOW

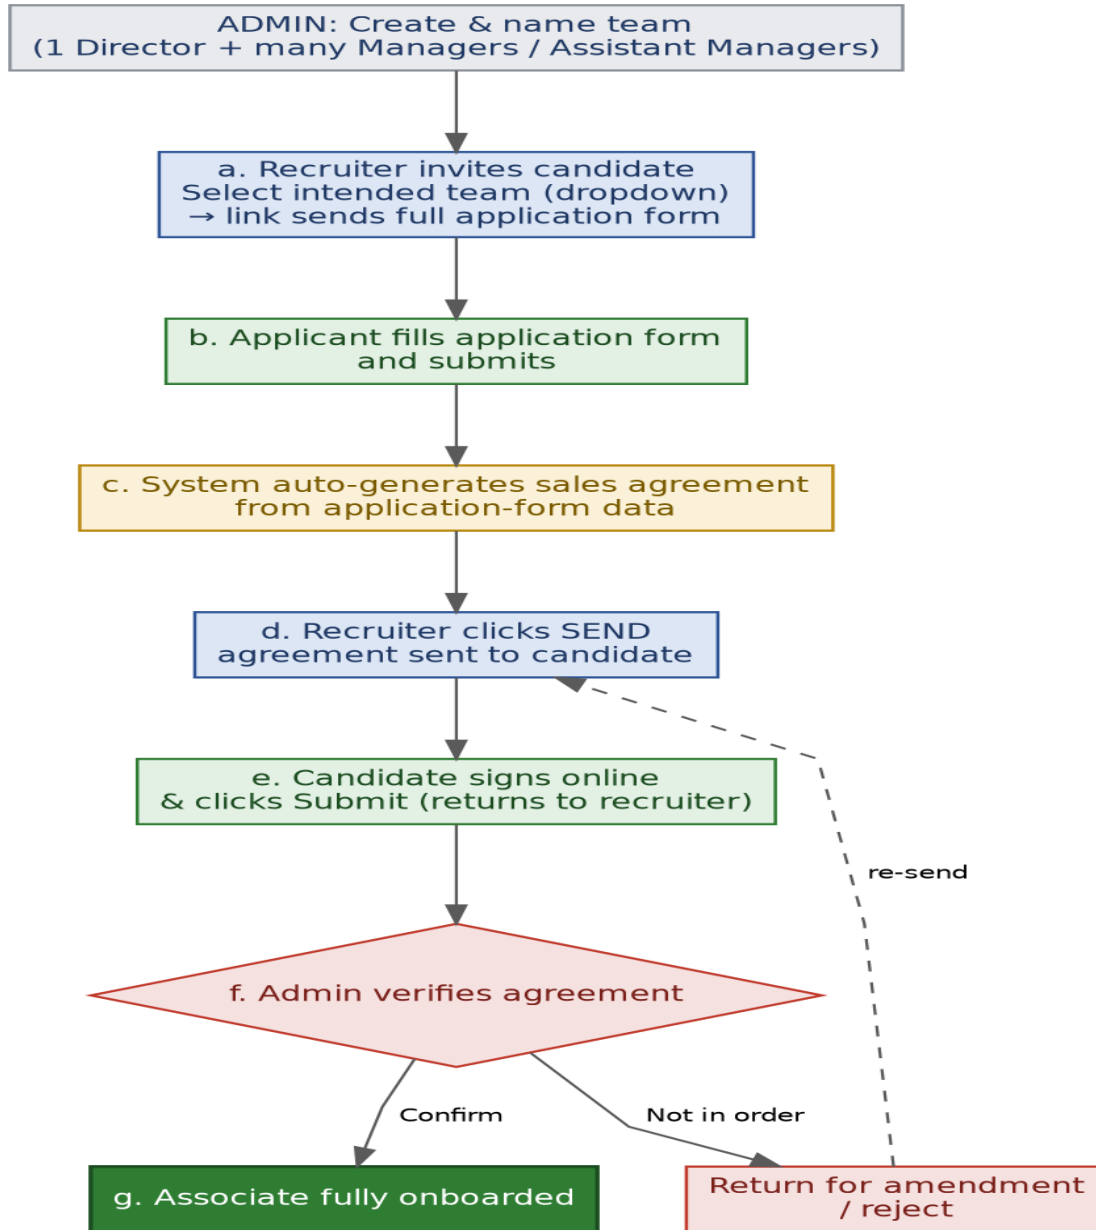

Setup (prerequisite)

Admin can create teams and name them.

Each team is headed by exactly one Director, and may have many Managers and Assistant Managers.

A recruiter picks which team a new candidate joins when sending the invite.

Flow diagram

Step-by-step

Step	Actor	Action
0	Admin	Create and name the team. Assign one Director (head); attach Managers and Assistant Managers.
a	Recruiter	Start recruitment by inviting the candidate. Select the intended team from a dropdown (which team the user will belong to). Business Admin may optionally set a Commencement Date on the invite (otherwise it defaults to the agreement send date). The invite link sends the candidate the full application form.
b	Applicant	Fill up the application form and submit.
c	System	On submit, auto-generate a sales agreement pre-filled from the application-form data (incl. Marital Status and Spouse conflict declaration).
d	Recruiter	Click SEND to send the generated agreement to the potential associate. Commencement Date =

Step	Actor	Action
		this send date unless overridden at invite.
e	Candidate	Sign the agreement online and click Submit to return it to the recruiter.
f	Admin	Verify the agreement and confirm. If not in order, return for amendment / re-send.
g	System	Once confirmed, the associate is fully onboarded.

Field mapping (step c) — Application → Agreement

Templates received

Associate Application (V-2023-07) and Associate Agreement (V.2026-04) — Enshrine Holdings Pte Ltd.

Step c auto-fills the agreement from the application. The mapping below shows what maps cleanly, what must come from elsewhere (GAP), and what the system/admin fills.

Agreement field	Application source	Status
Name (as in NRIC/Passport)	Name as in NRIC	✓ Mapped
Business Name	Business Name as in Business Card	✓ Mapped
NRIC No	NRIC Number	✓ Mapped
Nationality	Nationality	✓ Mapped
Date of Birth	Date of Birth	✓ Mapped
Gender	Sex	✓ Mapped
Marital Status	Marital Status (added to form)	✓ Mapped
Home Address	Residential Address (Block/Street/Unit/Postal)	✓ Mapped
Mobile No	Mobile Number	✓ Mapped
Religion	Religion	✓ Mapped
Emergency contact (Name/Relationship/Address/Contact)	In the event of emergency block	✓ Mapped
Spouse conflict Y/N + Company + Designation	Spouse / Conflict of Interest (added to form)	✓ Mapped
Associate Name + NRIC (signature block)	Name + NRIC Number	✓ Mapped
Commencement Date	Agreement send date (Business Admin can override on invite)	✓ Resolved
Agreement execution date	— (date signed)	⚙ System
Associate ID (For Official Use)	— (auto at onboarding)	⚙ System
Tier 1 / Tier 2 Manager (For Official Use)	— (from team assignment)	⚙ System

GAP fields — RESOLVED

1. Marital Status — added to the Application form (Applicant Particulars). Now auto-fills.
2. Spouse conflict-of-interest (Y/N + Name of Spouse + Company + Designation) — added to the Application form as a dedicated declaration. Now auto-fills.
3. Commencement Date — defaults to the date the agreement is sent (step d). Business Admin may override with a chosen date at invite (step a).

Updated form: Enshrine Associate Application V-2026-07.

 System / admin-populated (confirmed sources)

- Agreement execution date = system date captured at online signing (step e).
- Associate ID = auto-generated when Admin confirms onboarding (step g).
- Tier 1 / Tier 2 Manager = derived from the team assignment made via the intended-team dropdown at invite (step a). These align with the direct-upline / second-upline commission fields.

Developer — Technical Requirements

- Team management (Admin): create/name team; assign one Director; attach many Managers + Assistant Managers.
- Step a: "intended team" changes from free text to a dropdown of existing teams. Add an optional Commencement Date picker on the invite (Business Admin) — if left blank, commencement date = agreement send date (step d). Invite link delivers the full application form (V-2026-07).
- Step b: application-form submission captured and stored against the candidate record (now includes Marital Status + Spouse conflict fields).
- Step c: agreement generator maps application-form fields → sales agreement per the field-mapping table above. All previously-gapped fields now auto-fill; only execution date, Associate ID and Tier 1/2 Manager remain system-populated.
- Step d: "Send" action pushes the agreement to the candidate; log send timestamp.
- Step e: online signing + Submit returns the signed agreement; capture signature + timestamp.
- Step f: Admin verification gate — Confirm or Return-for-amendment (re-send loop). Log every action to the audit log.
- Step g: on confirm, mark associate fully onboarded and provision system access.

2. PRODUCT CREATION WORKFLOW

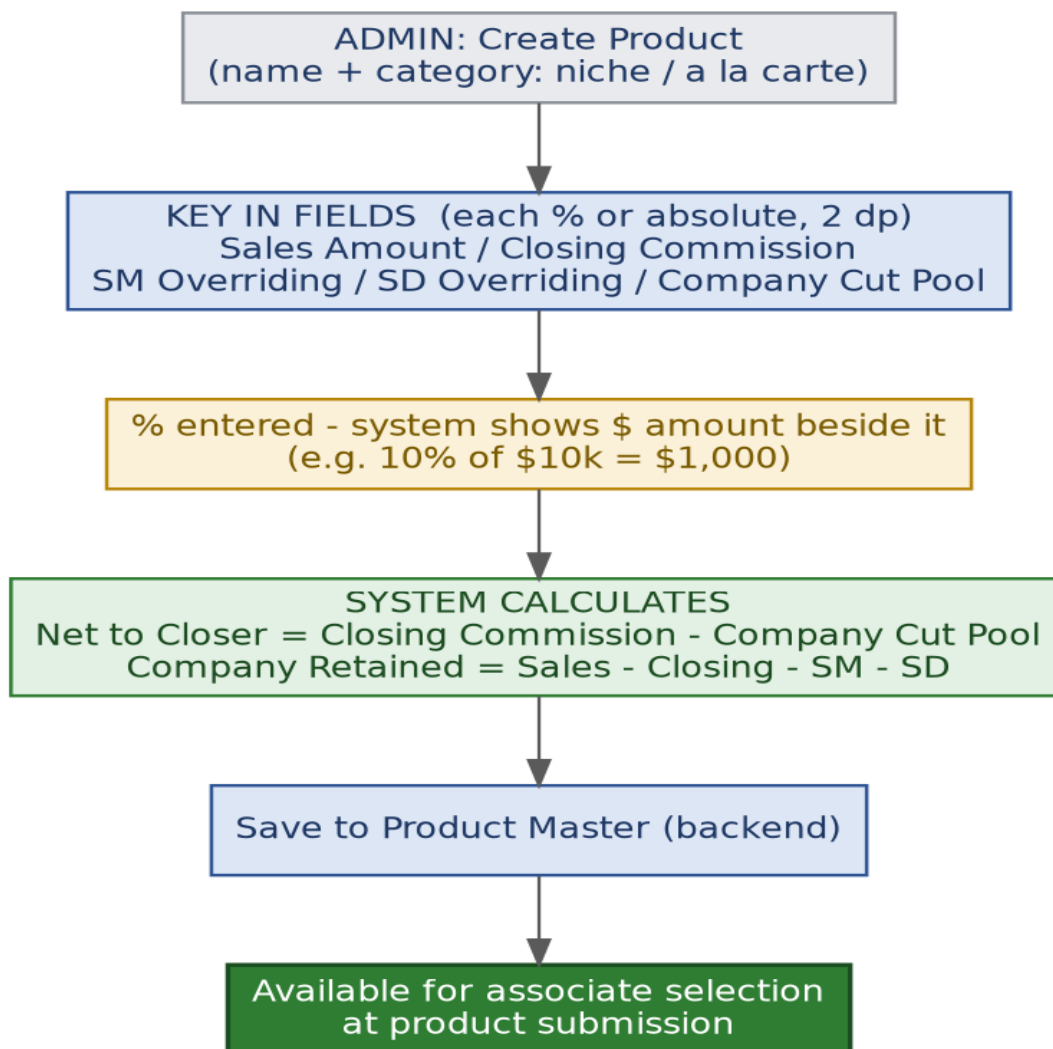

Project Owner — What this means

Admin creates each product by keying in a set of fields. Every field can be entered as a percentage or an absolute amount (to 2 decimal places, per Global Rule 1).

When a percentage is entered, the system shows the equivalent dollar amount beside it — e.g. 10% closing commission on a \$10,000 sale displays \$1,000.

Two values are calculated automatically: Net to Closer (what the closing associate actually receives) and Company Retained (the company's share).

Flow diagram

Product fields

Field	Entry	Notes
Sales Amount	Absolute	The product price / total sale value.
Closing Commission	% or absolute	Commission for closing the sale (gross, before cut pool).
SM Overriding	% or absolute	Override to the direct upline (Sales Manager).
SD Overriding	% or absolute	Override to the second upline (Sales Director).
Company Cut Pool	% or absolute	Company's slice taken from the closing commission.
Net to Closer	Calculated	= Closing Commission – Company Cut Pool.
Company Retained	Calculated	= Sales Amount – Closing Commission – SM Overriding – SD Overriding.

Calculation logic

Formulas

Net to Closer = Closing Commission – Company Cut Pool

Company Retained = Sales Amount – Closing Commission – SM Overriding – SD Overriding

All % fields (including Company Cut Pool) are computed on the Sales Amount. Only these two values are computed; all other fields are keyed in. The company's total take = Company Retained + Company Cut Pool.

Worked example (10% / 5% / 3% / 2% on a \$10,000 sale)

Field	Entered	Shown \$
Sales Amount	—	\$10,000.00
Closing Commission	10%	\$1,000.00
SM Overriding	5%	\$500.00
SD Overriding	3%	\$300.00
Company Cut Pool	2%	\$200.00
Net to Closer (= 1,000 – 200)	calc	\$800.00
Company Retained (= 10,000 – 1,000 – 500 – 300)	calc	\$8,200.00

Balance check: Net to Closer \$800 + SM \$500 + SD \$300 + Company Retained \$8,200 + Company Cut Pool \$200 = \$10,000.

Developer — Technical Requirements

- Product master stores: name, category (niche / à la carte), sales_amount, closing_commission, sm_overriding, sd_overriding, company_cut_pool — each with {mode: %|absolute, value} at 2 dp.
- Live-compute and display the \$ equivalent beside any field entered as a %, based on Sales Amount (this includes Company Cut Pool — % of Sales Amount).
- Net to Closer = closing_commission – company_cut_pool (computed, read-only).
- Company Retained = sales_amount – closing_commission – sm_overriding – sd_overriding (computed, read-only).
- On save, product becomes selectable by associates at product submission (Flow 3).

Notes

RESOLVED: when Company Cut Pool is entered as a %, it is a % of Sales Amount (consistent with the display rule for all fields).

Supersedes the earlier v1 product-config field list (company_profit_pct is replaced by the Company Retained / Company Cut Pool model).

RESOLVED: the associate 1/2/3 split (Flow 3) divides Net to Closer — confirmed by the client in the submission flow.

3. PRODUCT SUBMISSION WORKFLOW

Project Owner — What this means

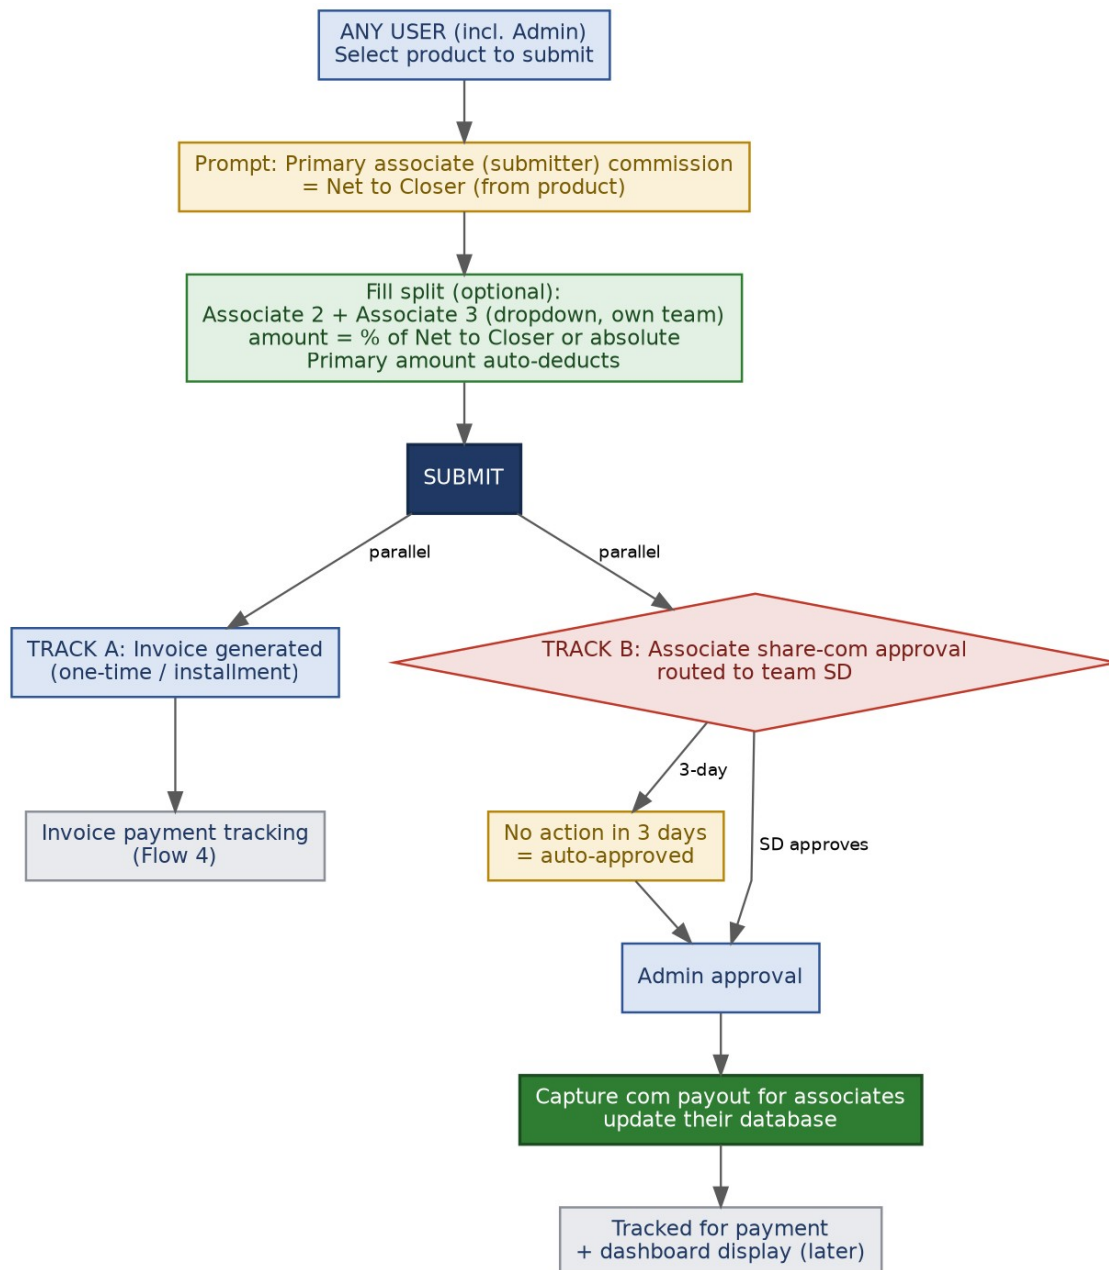

Anyone can submit a product — including Admin.

The submitter (Primary Associate / Associate 1) is shown their commission for the product, which is the Net to Closer from product creation.

They may optionally split it with Associate 2 and Associate 3 (picked from their own team). Splits can be a % of Net to Closer or an absolute amount; the \$ equivalent shows beside a %. The primary's amount auto-reduces as splits are filled.

On submit, an invoice is generated and two parallel processes run: (A) invoice payment tracking, and (B) associate share-commission approval.

Flow diagram

Step-by-step

Step	Actor	Action
1	Any user	Select the product(s) to submit (Admin included).
2	System	Prompt shows the Primary Associate (submitter) commission = Net to Closer for that product.
3a	Submitter	Optionally add Associate 2 (dropdown, own team) + split amount (% of Net to Closer or absolute; \$ shown beside %).
3b	Submitter	Optionally add Associate 3 (same as above).
3c	System	Primary Associate amount = Net to Closer - (Associate 2 + Associate 3). If 2 & 3 blank, primary keeps the full Net to Closer.
4	Submitter	Submit — triggers the product submission workflow.

Step	Actor	Action
5	System	Generate invoice (one-time or installment) — available for download.
6	System	Run two parallel tracks: A = invoice payment tracking (Flow 4); B = associate share-com approval.
B1	Team SD	Approve the associate share-commission split. No action in 3 days = auto-approved.
B2	Admin	Approve the commission table.
B3	System	On admin approval, capture the com payout for each associate, write to their database → tracked for payment + dashboard display.

 Resolves earlier open item

The associate 1/2/3 split divides Net to Closer (not the gross Closing Commission). This confirms the Flow 2 consistency question.

Invoice design

 Project Owner — What this means

A system-generated invoice for the platform, styled for Enshrine. It carries the customer (Bill To), the sales associate, the product line + amount, totals, the payment plan (one-time or 12/24-month installment), accepted payment methods, and a required invoice-number reference so payments can be matched.

Tel: 9009 9234 · contacts@enshrine.sg · www.enshrine.sg

INVOICE

Invoice No. **INV-2026-00123**
Issue Date **18 Jul 2026**
Due Date **01 Aug 2026**
UEN **202328861K**

BILL TO

Customer Full Name
Block / Unit, Street Name
Singapore 000000
Contact: +65 0000 0000

SALES ASSOCIATE

Associate Name
Associate ID: SA-00456
Business Name (on record)
Team: (assigned team)

NO.	DESCRIPTION	QTY	UNIT PRICE	AMOUNT
1	Single Niche — Category A Afterlife memorial service package	1	\$10,000.00	\$10,000.00
Subtotal				\$10,000.00
GST (if applicable)				\$0.00
Total Payable				\$10,000.00

PAYMENT PLAN

☐ One-time payment (full amount due by due date) | ☒ Installment plan: ☐ 12 months ☒ 24 months
1st month: Deposit / booking fee **\$1,000.00** + first installment **\$375.00** · thereafter **\$375.00** / month

PAYMENT METHODS

- PayNow (Company UEN): **202328861K**
- Bank Transfer: Bank / Account No.
- Cheque payable to: respective company

IMPORTANT

Please quote the **Invoice Number** (and your name) as the payment reference so we can match your payment.

Reference required: INV-2026-00123

Authorised Signature (Company)
This is a system-generated invoice from the Virtual Office platform.

Customer Acknowledgement
Enshrine Holdings Pte Ltd · UEN 202328861K

Developer — Technical Requirements

- Submission form fields: product(s); Associate 1 = submitter (auto, = Net to Closer); Associate 2 & 3 (team dropdown) with split value {mode %|absolute, 2 dp}; live \$ display for % (base = Net to Closer); primary auto-recalculates.
- On submit: generate invoice number, populate Bill-To + associate + line items + totals; support one-time and 12/24-month installment (deposit + monthly).
- Invoice fields: number, issue/due dates, UEN, Bill-To, sales associate (name + ID), line items, subtotal/GST/total, payment plan, payment methods (PayNow UEN / bank / cheque), invoice-number reference note, signature blocks.
- Parallel Track A: invoice → payment tracking (Flow 4). Parallel Track B: share-com approval → SD (3-day auto-approve) → Admin → capture payout to associate DB.
- Every approval / auto-approval / payout capture is written to the audit log (Global Rule 2).

4. PAYMENT TRACKING WORKFLOW

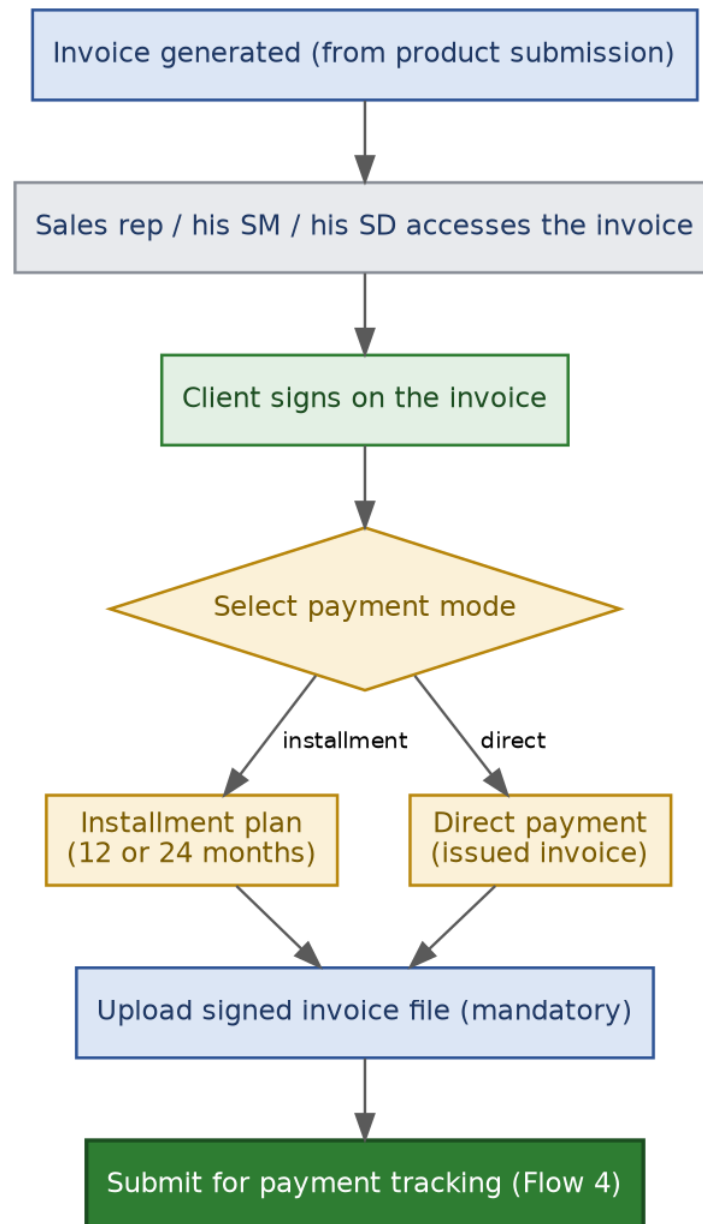

4.0 Precursor — invoice signing & submission for tracking

Project Owner — What this means

After a product is submitted and the invoice is generated, the sales representative — the associate, OR his SM, OR his SD — can access that invoice and get the client to sign on it.

The rep selects one of two payment modes: (1) Installment plan (12 or 24 months), or (2) Direct payment.

A signed-invoice file upload is mandatory before the application can be submitted for payment tracking.

Step	Actor	Action
P1	Rep / SM / SD	Access the generated invoice (submitting associate or their SM / SD in the chain).

Step	Actor	Action
P2	Client	Sign on the invoice.
P3	Rep	Select payment mode: Installment plan (12 / 24 months) OR Direct payment.
P4	Rep	Upload the signed invoice file (mandatory).
P5	Rep	Submit — the invoice enters payment tracking (Flow 4).

Precursor requirements

- Invoice access for signing extends to the submitting associate and their SM and SD (chain oversight), not just the submitter.
- Payment-mode selector: Installment (12 | 24 months) or Direct payment; store the choice on the invoice.
- Mandatory signed-invoice file upload; block submission-to-tracking until a file is attached.

4.1 Payment tracking (Business Admin)

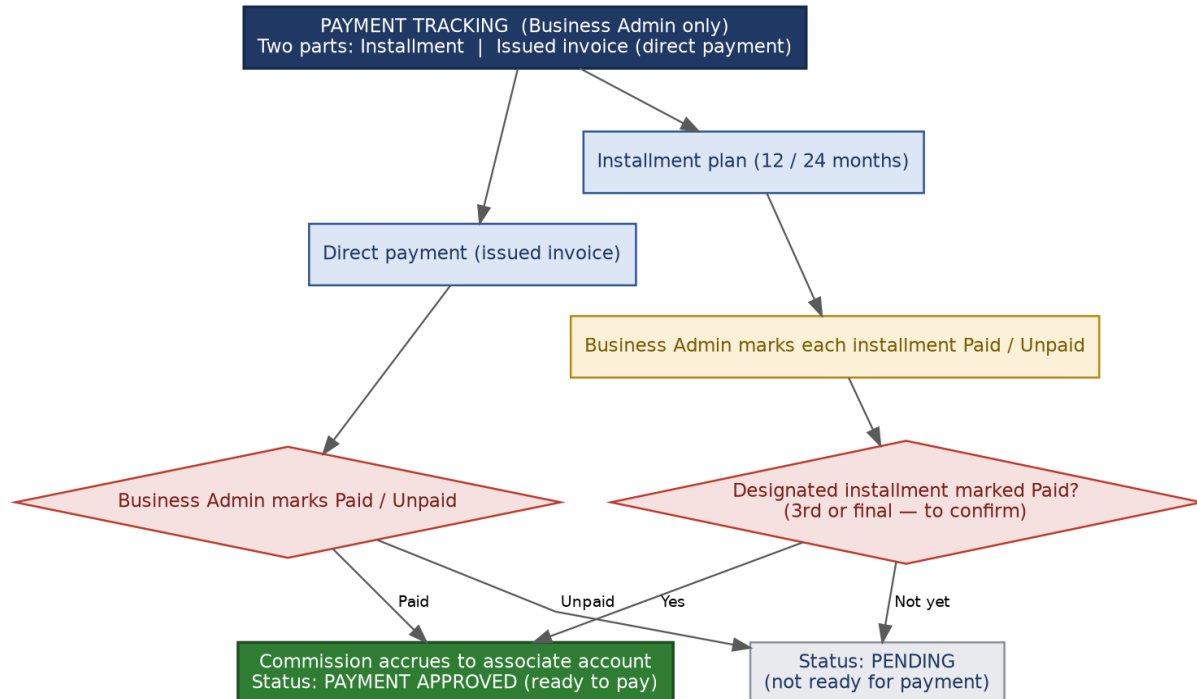

Project Owner — What this means

Payment tracking is a Business Admin-only function. It tracks two parts: (1) Installment plans and (2) Issued invoices (direct payment).

Business Admin updates each invoice's result as Paid or Unpaid.

Direct payment: once marked Paid, the commissions accrue into the appropriate associates' accounts and the invoice shows Payment Approved (ready to be paid). If not paid, it stays Pending and is not ready for payment.

Installment: the same, except the invoice is only considered Paid — and commission released — after the designated installment is marked Paid.

Step	Actor	Action
1	Business Admin	Open payment tracking (BA-only). View the two parts: Installment and Issued invoice (direct).
2	Business Admin	Direct payment: mark the invoice Paid or Unpaid.

Step	Actor	Action
3	System	If Paid → accrue commissions to each associate's account, set status Payment Approved (ready to pay). If Unpaid → status Pending (not ready).
4	Business Admin	Installment: mark each installment Paid / Unpaid as payments come in.
5	System	Installment invoice is considered Paid only after the designated installment is marked Paid → then accrue commissions + Payment Approved. Until then → Pending.

Payment tracking requirements

- Restrict the entire payment-tracking module to Business Admin.
- Two tracked types: direct (single Paid/Unpaid) and installment (per-month Paid/Unpaid schedule).
- On the trigger becoming Paid, accrue each associate's share (from the Flow 3 split) to their account and set the invoice to Payment Approved.
- Approved payouts feed the associate's payment record + dashboard; Pending payouts are excluded from payment runs.
- Log every Paid/Unpaid change and every accrual to the audit log (Global Rule 2).

To confirm

Installment completion trigger: you wrote the "tired" installment. Please confirm whether commission releases after the 3rd installment or the final installment. The diagram/text currently say "designated installment (3rd or final — to confirm)".
